About this document

This Data Health Profile summarises key population, health, and social wellbeing indicators for Central Queensland within the QAIHC network, compiled from the most recent data available at time of publication.

Data sources: 1. Australian Bureau of Statistics, 2021 Census; 2. ABS National Aboriginal and Torres Strait Islander Health Survey, 2022-23; 3. Queensland Health Department, 2023; 4. Australian Immunisation Register Coverage Report, data to 31 March 2026; 5. Public Health Information Development Unit, 2025; 6. Queensland Social Housing Registry.

Where a statewide Queensland benchmark was not available, figures instead compare each Member Service's First Nations and non-Indigenous populations within the same catchment; this is noted alongside the relevant chart.

Prepared by the QAIHC Health Information Team. This profile is reviewed and updated quarterly.
